NOTICE

Before placing orders for fruit trees elsewhere we would suggest that you send us your list of varieties for our special quotation as there are many varieties that we have in surplus and are able to give a much lower price on than our published prices in quantities.

Pomona's Prosperity Catalogue

❁ *Spring and Fall 1932* ❁

FUNNY, isn't it, how long it takes most of us to wake up. Take planting for instance. Nature has no end of planting time. But you and I used to sort of draw a ring around **March, April and May**, as the only safe and sure time. What wasn't done then had to wait until next year. One day, somebody woke up to the fact that a lot of Nature's own planting is done the fall before.

However, there's no need now to jog you about that. But don't take it for granted everybody remembers as well as you do. But to keep right on getting business, we have to keep right on memory jogging patrons we get business from. That's why we are sending you **Pomona's Prosperity Catalogue** at this time.

Pomona Trees at New Low Prices

We do not belong to any organization or group of nurserymen for holding up prices but sell direct to the planter at a **LIVE AND LET LIVE PRICE**. Compare **POMONA** prices for the same grade of stock with those of our responsible competitors and learn what you will save in ordering from us.

Forty Years Dealing Direct With the Planter

It's a pleasure to present with this catalogue, our latest, which portrays as clearly as possible the knowledge we have gained about trees. Trees have been our life work—we have grown up with them. We have learned to plant them, cultivate them, and to call them by name.

In the development of such a business as we now conduct representing forty years of painstaking labor, there has been a vast store of knowledge "laid by." It is our intention to place this reserve fund at the disposal of our customers, and that they may receive prompt and careful attention we have **INSTITUTED** our **SERVICE DEPARTMENT**, by means of which the buyer can feel that he will receive absolutely impartial and as nearly accurate information on planting as it is possible for us to give, at any time.

Fresh Dug Trees

POMONA'S fresh dug trees are budded on the best whole rooted imported French stock, propagated by us from certified trees and bearing orchards, free from disease, insect pests and true to name. Our **C. O. D.** offer enables you to take advantage of ordering now. Yesterday is gone, forget it. Today is here, use it. Never leave till tomorrow what you can do today.

Flowering Shrubs

Butterfly bush.

attractive flowers, render them deservedly among the most popular of flowering shrubs. The flowers are produced in June in racemes 4 to 6 inches long.

Deutzia, Double Flowering (Crenata)—Flowers double white, tinged with rose. One of the most desirable flowering shrubs in cultivation.

Deutzia, Pride of Rochester—A new variety raised from *Deutzia Crenata*, and exceeding all others in size of flowers, length of anicles, profuseness of bloom and vigorous habit; a charming acquisition to the list of *Deutzias*.

Deutzia Lemoinei—Flowers pure white, borne on stout branches of upright growth. Dwarf and free flowering, much prized for cemetery planting and in front of taller shrubbery.

Deutzia, Slender Branched (Gracilis)—A charming variety introduced by Dr. Siebold. Flowers pure white and so delicate that they are very desirable for decorative purposes.

DOUBLE FLOWERING ALTHEA (*Rose of Sharon*)—One of the most showy flowering shrubs; strong, erect growing, with large bell-shaped, double flowers of striking color, borne abundantly in August and September.

Double Red Althea (*Rubra flore pleno*).

Double Purple Althea (*Purpurea fl. pl.*)

Double White Althea (*Alba flore pleno*).

Althea, Tree Form—In red, white and purple. Mention colors when ordering.

3 to 4 ft.....\$1.35 each

Butterfly Bush—Seems to attract butterflies in large numbers. It produces long, graceful stems which terminate in tapering panicles of beautiful lilac-colored flowers that are of miniature size and borne by the hundreds on a flower head which is often ten inches long.

Calycanthus (*Sweet Scented Shrubs*)—Flowers purple, very double and deliciously fragrant; remains in bloom for a long time.

18 to 24 inch.....50c each

DEUTZIA—This valuable species of plants comes to us from Japan. Their hardiness, luxuriant foliage and profusion of

Deutzia, Pride of Rochester.

PRICE FOR ALL SHRUBS LISTED ON THIS PAGE

Unless Otherwise Priced:

Strong 2 Year Bushes, 2 feet and up, 35 cents each, 10 for \$2.75.

If Shrubs are ordered by mail add 3 cents to each shrub to cover cost of mailing.

Golden Syringa.

LILACS—Best beloved of all the old time garden shrubs; whose flowers never fail to charm with their delicate beauty or refresh the soul with their fragrance.

Lilac, Purple—The well known variety, one of the best. A good grower; flowers and young wood fragrant; purple.

Lilac, White—A very desirable contrast to the purple; those who have one should have the other.

Quince, Japan Scarlet (Cydonia)—Has bright scarlet crimson flowers in great profusion, early spring; one of the best hardy shrubs; makes a beautiful, ornamental hedge.

Snowball, Common—Flowers white, in clusters, very attractive when in bloom, May to June.

Snow Berry—An old time shrub. Produces clusters of pure white berries which remain nearly all winter.

Syringa, Golden-Leaved (P. Folii Aureis)—A beautiful new variety with bright yellow foliage, which affords pretty contrasts with other shrubs, especially with the purple-leaved variety.

Syringa, European Fragrant or "Mock Orange" (Philadelphia Coronarius)—A well known very hardy shrub, with showy white flowers which are very fragrant.

Fringe, White—Fringe-like, fragrant white flowers in May; has purple colored ornamental fruit.

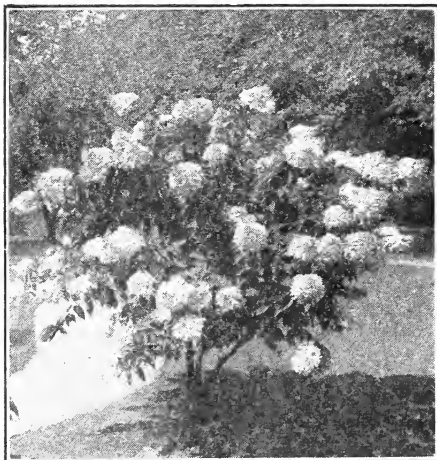

2 feet and up.....\$1.75 each

Golden Elder—Bright yellow foliage, which affords pretty contrast with other shrubs.

Hydrangea Arborescens Grandiflora Alba (Hills of Snow)—This hardy American shrub is the very finest addition to this class of plants found in many a year. The blooms are of the very largest size, of pure snow-white.

2 yr. Bushes, 2 feet and up, 35c each,
10 for \$2.75.

Hardy Bush Hydrangea (Paniculata Grandiflora)—We urge our friends to plant the Hydrangea. Plant it for the following reasons: It is hardy, enduring the severest winters outdoors without protection. It is easily transplanted, not one in a thousand dying. It never fails to blossom the first year planted; no matter how small the plant, it immediately buds out in great profusion of flowers. When the specimens first open they are greenish white, later they turn to a pure white, and still later to a delicate pink.

Bush Hydrangea.

Price for all Shrubs listed on this page, unless otherwise priced:
Strong 2 Year Bushes, 2 feet and up, 35 cents each, 10 for \$2.75.

If Shrubs are ordered by mail add 3 cents to each shrub to cover cost of mailing.

Dogwood (Cornus Alba)—Its blood-red bark in winter is very conspicuous with its light blue berries. In early summer it is a mass of exquisite white flowers, contrasting beautifully with red twigs.

Honeysuckle Tartarian—A rapid grower. Makes a wonderful showing the first season. Fragrant, pink flowers in May and June, followed by a wealth of orange-red berries.

Weigela Candida—Profusion of pure white flowers blooming in June. Very bushy in its growth.

Weigela, Variegated-Leaved (Fol. Variegated)—Leaves bordered with yellowish white, finely marked, flowers bright pink.

Weigela Florabunda (Crimson Weigela)—The flowers are dark crimson, with white stamens projecting from them, reminding one somewhat of Fuschia flowers. It blooms in the spring with other Weigelas, but if plants are topped off after young growth has been made, they bloom profusely in the fall. One of the best.

Weigela Eva Rathke—Flowers brilliant crimson; beautiful, distinct, clear shade.

Weigela Rosea (Rose-colored Weigela)—An elegant shrub, with fine rose-colored flowers; of erect, compact growth; blossoms in June.

Forsythia (Golden Bell)—Their bright, golden masses of glinting yellow appears before the leaves and are welcome harbingers of spring.

SPIRAEAS—A class of low, compact, easily grown flowering shrubs, vigorous and hardy as a class, with blossom periods extending over a wide range of seasons. We offer the following varieties:

Spiraea Anthony Waterer—This beautiful variety has the same habits as its parent the Blumalda. It blooms about the close of June, continuing throughout the entire season. It is useful for edging, planting in masses, or as a single specimen where a low, bushy shrub is required.

Spiraea Billiardi (Billiard's Spiraea)—Rose colored, blooms nearly all summer.

Spiraea Prunifolia (Bridal Wreath)—Very double, showy, pure white flowers.

Spiraea Blumalda—New, and considered one of the finest of this class. Flowers brilliant pink, with variegated foliage.

Spiraea Callosa Alba—A white flowering variety of dwarf habit; very fine, remains in flower all summer.

Spiraea Thunbergii (Thunberg's Spiraea D.)—Of dwarf habit and rounded, graceful form; branches slender and somewhat drooping; foliage narrow.

SPIRAEA VAN HOUTTEI—Better known and more largely planted than any other shrub. An extremely graceful shrub with long, drooping branches completely covered with flat clusters of white flowers in May and June. When in blossom a hedge of Spiraea Van Houttei is a sight long to be remembered. Cannot be too highly recommended.

Spiraea Van Houttei makes a beautiful hedge.

8 to 10 feet.....\$2.00 each, 10 for \$15.00

10 to 12 feet.....\$2.50 each, 10 for \$20.00

American Elm—A noble native tree of great size and wide spread, with graceful drooping branches and handsome leaves. One of the best tree types for towering, heady effect and wide-spread shade, in the yard itself. Indispensable to shaded parks, and largely used along the sides of wide avenues.

6 to 8 feet.....\$1.00 each, 10 for \$ 9.00

8 to 10 feet.....\$1.50 each, 10 for \$12.50

10 to 12 feet.....\$2.00 each, 10 for \$17.50

Hydrangea, P. G., Tree Form—Never fails to bloom. Very hardy, enduring the severest winters outdoors without protection. Will grow anywhere in any soil.

3 to 4 feet.....\$1.25 each, 10 for \$10.00

2 to 3 feet.....\$.75 each, 10 for \$ 6.00

Mulberry, Russian—A very hardy rapid growing tree. Fruit a medium size and a great bearer.

6 to 8 feet.....\$1.00 each, 10 for \$7.50

Tea's Weeping Mulberry—Slender, vine-like branches that droop to the ground. Glossy, dark green foliage—a favorite for specimen use on small lawns.

5 to 6 feet.....\$1.50 each

Horse Chestnut, White Flowering—Has white flowers in May. Very hardy.

4 to 5 feet.....\$2.00 each, 10 for \$15.00

5 to 6 feet.....\$2.50 each

Crab, Bechtel's Flowering—Especially adapted for massing. Pink rose-like flowers. A very attractive flowering shrub.

3 to 4 feet.....\$1.00 each

4 to 6 feet.....\$3.00 each

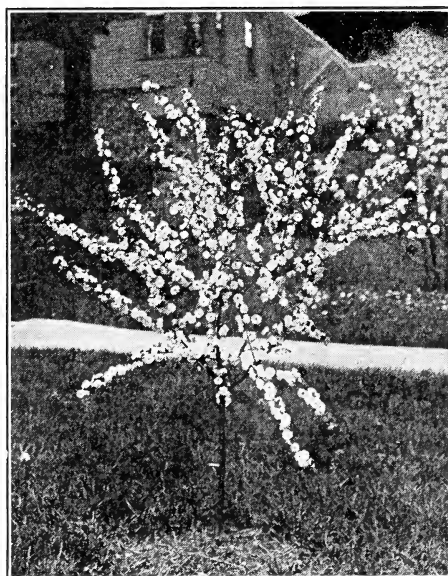

Birch, Cut Leaf, Weeping—White bark, drooping branches, finely cut foliage.

4 to 5 feet.....\$1.40 each

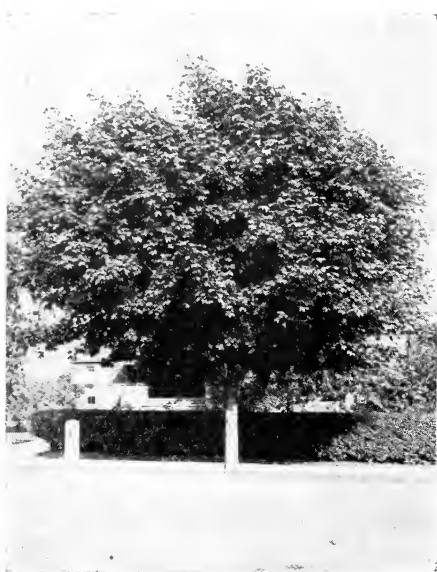

5 to 6 feet.....\$1.75 each

Catalpa Speciosa—Fragrant white flowers in July. Open irregular growth, large heart-shaped leaves.

6 to 8 feet.....\$1.00 each

Flowering Almond.

Norway Maple.

Catalpa Bungeii (Umbrella Tree)—Perfectly hardy and flourishes in almost all soils and climates with an umbrella-shaped top without pruning.

Price Catalpa Bungeii 2 Yr. Heads

	Each.	Ten.
4 to 5 ft. Trees.....	\$1.00	\$ 9.00
5 to 6 ft. Trees.....	1.25	10.00
6 to 8 ft. Trees.....	1.50	12.00

Lombardy Poplar—This is an old favorite. Well known and remarkable for its erect rapid growth, and tall, spiral form. Indispensable in landscape gardening, to break the ordinary and monotonous outlines of most other trees.

	Each.	Ten.	100.
5 to 6 ft.....	\$.45	\$4.00	\$20.00
6 to 8 ft.....	.70	6.50	35.00
8 to 10 ft.....	1.00	9.00	65.00

Poplar, Carolina—A remarkably rapid, luxuriant grower. Very large leaves, very glossy, deep green. Has the advantage over other shade trees in that it will grow in any kind of soil and will thrive in places where others will fail to live.

	Each.	Ten.	100.
5 to 6 ft.....	\$.40	\$3.50	\$25.00
6 to 8 ft.....	.65	6.00	35.00
8 to 10 ft.....	.75	7.00	50.00

Schwedleri Maple—With beautiful foliage which attracts attention at all seasons. Their gleaming red and purple contrasts brightly with the delicate green of other trees.

6 to 8 ft.....	\$2.50 each
----------------	-------------

Maple, Silver Leaf—A rapid growing maple of spreading habits, excellent for sandy soil. Foliage silvery on under side.

4 to 6 ft.....	\$.50 each, 10 for \$ 4.50
6 to 8 ft.....	\$1.00 each, 10 for \$ 9.00
8 to 10 ft.....	\$1.50 each, 10 for \$12.00

Maple, Ash Leaf—Fast growing, of spreading habit. Leaves light green.

5 to 6 ft.....	\$.75 each, 10 for \$ 5.00
6 to 8 ft.....	\$1.00 each, 10 for \$ 7.50
8 to 10 ft.....	\$1.25 each, 10 for \$10.00

Maple, Norway—Round headed tree with dark green foliage. Largely used for street and shade.

6 to 8 ft.....	\$1.50 each, 10 for \$12.50
8 to 10 ft.....	\$2.00 each, 10 for \$17.50

Maple, Sugar, Hard—Straight and spreading, dark green leaves turning to scarlet in the autumn.

6 to 8 feet.....	\$1.50 each, 10 for \$12.50
8 to 10 feet.....	\$2.00 each

Chinese Elm (Pumila)—A recently developed type specially adapted to the arid regions of our West and Southwest. There it thrives under natural adversity, growing very rapidly and to a good height. In the East and the Lake regions, its growth is so deliberate we may well consider it as a dwarf variety. The foliage is small and dense, the growth symmetrical and compact.

5 to 6 feet.....	\$1.25 each
6 to 8 feet.....	\$1.75 each
8 to 10 feet.....	\$2.25 each

Catalpa Bungeii.

Hedge Plants and Monthly Roses

CALIFORNIA PRIVET—A vigorous-growing variety, of fine habit, thick, glossy, nearly evergreen leaves. Of all ornamental hedge plants this is the most highly prized. If cut to the ground one or two years after planting, it makes a very thick hedge right from the bottom, sending up many strong shoots. The PRIVET in all its varieties deserves attention as an ornamental plant. It is almost an evergreen, and grows freely in all soils; compact and regular in its form, and bears shearing to any extent. The leaves are a rich green, and will remain on the plants up to Christmas, and if they are a little sheltered they will keep almost all winter.

POMONA LOW PRICE FOR CALIFORNIA PRIVET, 2 YEAR, WELL BRANCHED

12 to 15 inch.....	10 for \$.75	100 for \$3.00	1000 for \$25.00
18 to 24 inch.....	10 for \$1.00	100 for \$5.00	1000 for \$35.00
2 to 3 feet.....	10 for \$1.25	100 for \$6.00	1000 for \$45.00

If sent by mail add 3 cents each to cover cost of mailing.

Japan Barberry (Berberis Thunbergi)—

There is no shrub in existence so generally planted or more practical for all purposes where beautiful foliage effect is desired than this. It is dwarf growing, uniformly bushy and rounded in form, susceptible to formal pruning, with small, numerous leaves densely covering the thorny twigs. These give it paramount importance for use as a filler, and edging for shrubbery groups; as a foundation screen in front of porches; and, above all, as a compact, impassable, hardy, low hedge for confining lawns or dividing properties. The autumn foliage is scarlet or bronze, and the branches studded with crimson fruits.

Price Strong 2 Year Bushes, Well Branched

	Each.	Ten.	100.
12 to 18 inch.....	\$.15	\$1.25	\$12.00
18 to 24 inch.....	.20	1.75	15.00
2 to 3 feet.....	.25	2.00	18.00

If ordered sent by mail add 3 cents to each bush to cover cost of mailing.

BARBERRY (Berberis) Red Leaved Bar-

berry (Berberis Thunbergi Atropurpurea)—A highly important introduction among shrubs, giving us for the first time a practical easily grown shrub of medium height, with good, distinctly red foliage. This must prove a boon to all types of landscaping, where studied contrasts are to be worked out with the shrub foliage depended on for colors. Atropurpurea is an exact reproduction of Thunbergi in every way—habit, leaf-formation and fruiting, but—whereas the original is a deep green from spring until fall, this variety starts off in its first foliage a warm bronzy red; the heat of summer intensifying its red brilliancy; autumn adding other tints to its richness. The abundant scarlet berries persist throughout the winter along the spiny twigs.

Price Strong 2 Year Bushes

12 to 18 inch.....40c each, 10 for \$3.50

Hybrid Tea or Everblooming Monthly Roses

Their long blooming season begins in June and continues until frost. Require protection over winter in the extreme North. This protection consists of simply mounding up each bush with a mound of earth 8 or 10 inches high.

Columbia—Glowing pink. Strong grower.

Very free flowering. Almost thornless.

Gruss an Teplitz—Scarlet shading to crimson. Very fragrant. Profuse bloomer.

Killarney Pink—Flesh pink shaded with white and suffused pale pink.

Killarney White—Pure white. Long pointed buds. Very fragrant.

Lady Ashton—Deep carmine pink shading to yellow at base of petals.

La France—Fine peach-blossom pink. Large flowers of unusual fragrance.

Los Angeles—Flame pink shaded with gold at base of petals. Flowers large.

Price, Strong 2 Year Bushes, 60c each, 10 for \$5.50.

Mme. Butterfly—Bright pink, apricot and gold. Large, perfect bloomer.

Premier—Rich dark pink. Beautifully formed fragrant flowers.

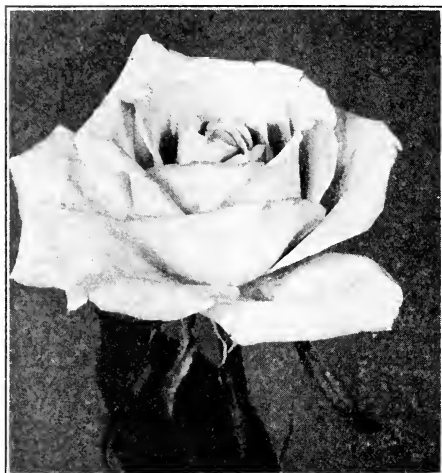

Pink Radiance—Bright carmine rose with opal and coppery reflections.

Red Radiance—Deep red. Very fragrant. Vigorous grower. Unusually hardy.

Sunburst—Light sulphur yellow. Strong, spreading grower.

Souvenir Claudius Pernet—Beautiful sunflower yellow. Vigorous, erect grower.

Hardy Hybrid Perpetual Roses

Magna Charta.

La France—Rich satiny peach, changing to deep rose; large and full. A constant bloomer.

Magna Charta—Pink and carmine; very large and full; a profuse bloomer. Fragrant. Free grower.

Frau Karl Druschki (Snow Queen)—A new rose of great merit. There is nothing in white roses quite as fine as this. Pure white, large and of elegant form.

Coquette des Alps—White, slightly shaded with carmine; strong grower and a great favorite.

Marshall P. Wilder—Bright cherry carmine; very fragrant.

Baron de Bonstetten—Flowers large and very double; color rich, dark red, passing to deep velvety maroon. Very fragrant.

Clio—New. The perfection in Hybrid Perpetuals. Of delicate satin blush with a little deeper center. Large, well shaped and very double. Strong, robust, hardy and prolific. A jewel.

Blanche Robert—Pure white, large and full, buds very beautiful. A strong grower and a desirable variety.

Alfred Colomb—Very large and full. Brilliant carmine crimson; extremely fragrant. A free grower.

American Beauty—Very large and double. Of globular shape. Deep pink, shaded with carmine. Fragrance exquisite.

Anne de Diesbach—Very large, brilliant crimson; fragrant, vigorous.

Paul Neyron—The largest of all. Deep rose color. A free bloomer and vigorous grower.

Mrs. J. Laing—Very free flowering; commences early and continues to bloom profusely until fall. Of delicate pink color.

Dorothy Perkins—Perfectly hardy; flowers of large size for this class of rose, usually about 1½ inches across; are borne in clusters from 10 to 30 and are very double; the petals are very prettily rolled back and crinkled. Color beautiful, clear shell pink.

Crimson Rambler—A climbing rose of unusual attractions. Very hardy, having withstood 10 degrees below zero without covering. Vigorous in growth, having grown 8 to 10 feet in a season. Produces a profusion of blossoms, having been known to produce 300 blossoms on one shoot. The Crimson Rambler is especially adapted for covering trellises.

Red Baby Rambler—A dwarf (bush) form of Crimson Rambler, and furthermore, ever-blooming. Will bloom continuously throughout the summer.

Frau Karl Druschki.

Apple Trees

WHILE there are many tempting fruits which nearly every person can grow in his field or garden, the apple has been proclaimed king of all, since it is so healthful, can be so easily grown, and can be used in so many ways. Whereas in old times an apple orchard of five or ten acres was considered a large planting, now orchards of one hundred, five hundred, eight hundred or a thousand acres are frequently found. Apple growing is now a business, whereas in former years it was simply a small side issue. Those who have good orchard lands, and there are thousands of acres of such lands in almost every township in each state, can devote their land to no more profitable use than by planting orchards. Our list of varieties embraces a selection of the best.

Yellow Transparent.

DUCHESS OF OLDENBURG—Large, round; streaked red on yellow; tender, juicy, pleasant; a kitchen apple of best quality and esteemed by many for dessert. Tree a vigorous, fine grower, and an abundant bearer. Aug. and Sept.

King of Tompkins County—One of the standard varieties grown for commercial purposes, and gives the greatest satisfaction when top-worked on some hardier variety. The fruit is of a bright red color, large and uniform. The flesh is yellowish, crisp, tender, juicy and sub-acid, and of the best quality.

STAYMAN'S WINESAP—Fruit medium, large; skin green and yellow, red-striped, flesh yellow, firm; quality excellent.

GRIMES' GOLDEN—Medium to large size; skin golden yellow, sprinkled with gray dots; flesh crisp, tender, juicy, sprightly, very good to best. Grown in the South and Southwest. Jan. to Apr.

RED ASTRACHAN—This hardy early variety is well known. Fruit large, roundish, nearly covered with deep crimson, handsome, juicy, good, highly esteemed on account of its fine appearance, earliness, and hardiness. August.

YELLOW TRANSPARENT—Early variety. Tree an upright grower and a very early and abundant bearer. Fruit of good size; skin clear white, turning to a pale yellow; flavor acid and very good. Ripens from ten days to two weeks earlier than Early Harvest.

McINTOSH—Not equalled in quality and flavor by any other variety. Due to its very high quality and its exceedingly attractive appearance, it commands a ready sale and a fancy price in all the large eastern markets. Rapidly making a place for itself as one of the leading if not the leading commercial apple of the east. The fruit is very attractive in appearance, of bright deep red color, which in highly colored specimens is almost purplish-red overspread with a thin lilac bloom. Fruit above medium in size, flesh white, firm, very crisp, fine grained, tender, very juicy. Sprightly sub-acid in flavor with a characteristic perfume and aroma. Comes into bearing about the fourth year and is a reliable cropper, yielding good crops biennially and sometimes annually. October to December.

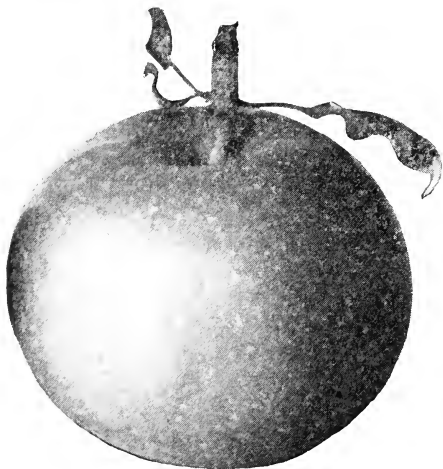

Rome Beauty.

ROME BEAUTY—Keeps in good condition till May and June. Large, round, mottled and striped in different shades of red; flavor and quality away above the average; appearance and size are its valuable points; always sells and always brings good prices. Good grower, blooms late, bears heavily every year, is adapted to a wide range of soils, elevations and conditions.

Early Harvest—Medium to large; pale yellow; fine flavor. Tree a moderate, erect grower, and a good bearer; a beautiful and excellent variety for orchard and garden. August.

Twenty Ounce—Very large; greenish, becoming yellow, mottled and splashed with bright red. Flesh tender and juicy. September.

McIntosh.

Maiden's Blush—Medium size, flat, quite smooth and fair; pale yellow with beautiful red cheek. Tender, sprightly, pleasant acid flavor. Tree vigorous and productive. Good market variety. September and October.

Golden Russet—Medium to large size, dull russet, with a tinge of red on the exposed side; flesh greenish, crisp, juicy, and high flavored; hardy, bears well. November.

Yellow Belleflower—Season, winter. A hardy apple of large size, a beautiful golden color, often with red, blush; conical in shape. Flesh very tender and fine grained, crisp, juicy, sub-acid, of excellent quality. Oct. to Feb.

Red Delicious.

DELICIOUS RED—This apple is appropriately named for it is of handsome appearance as well as high quality, rivaling Spitzenburg. It is oblong in shape and its bright red and yellow skin is very handsome. This apple has been largely planted in the Northwest and ranks high in commercial orcharding. Since it has made good in the apple growing sections someone had said it is a gem.

LOBO (McIntosh Seedling)—Above medium size; roundish conical; stem short to medium, color bright crimson; skin thick, tough; flesh white with traces of red, fine grained, tender, juicy; sub-acid, sprightly, pleasant, good flavor and quality. October.

Cortland.

BALDWIN—A great market apple, very productive of fair handsome fruit. No variety yields larger crops or bears shipment better, or is more attractive in color, size and shape, than the Baldwin. It is esteemed as an eating apple, and for cooking. Thousands of barrels of this fruit are exported to England annually. For a commercial orchard it can be relied upon. Large, bright red, crisp, juicy and rich; tree vigorous, upright and productive.

NORTHERN SPY—This variety has long been a favorite in commercial sorts in northern New England, New York, Michigan, etc. It is superior to some other standard varieties in flavor and quality and commands top prices. Large, striped and quite covered on the sunny side with dark crimson; and delicately coated with bloom. Juicy, rich, highly aromatic, retaining its freshness of appearance and flavor till July. A remarkably rapid, erect grower, and a great bearer. December to March.

Wagener—Medium to large; deep red in the sun; flesh firm, sub-acid, and excellent; very productive, bears very young. December to May.

Cortland—Is as large as that of McIntosh, or larger; round to somewhat conical in shape. In color it is a bright red blushed with darker red splashed and striped with carmine and more or less overlaid with a deep purplish bloom. The flesh is white, often with a pinkish tinge, fine, crisp, tender, juicy, sub-acid and aromatic. The trees are large, vigorous, upright-spreading, very hardy, productive and healthy. Three weeks later than McIntosh.

Winter Banana—Perfect in form; golden yellow, and beautifully shaded with bright crimson red; flesh lemon-yellow, fine grained, sub-acid, rich, aromatic flavor, and of the highest quality. A good keeper. Tree remarkably strong grower. A valuable market variety. November to January.

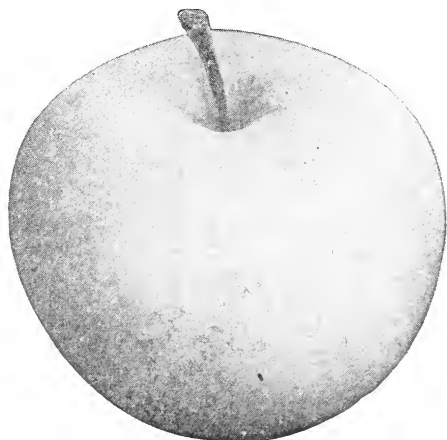

Tolman Sweet—Season, winter. Medium to large size; color, light yellow; flesh, white, firm, rich, and very sweet. Excellent for winter baking. Keeps well into spring. November to April.

RHODE ISLAND GREENING—This large and superior winter apple is famous over a large extent of country, and is more highly prized for cooking and eating than any other variety. It is a good keeper but will keep better if picked early.

WEALTHY—This is a beautiful, hardy winter apple, originating in Minnesota. Fruit large, roundish; skin smooth, oily, covered with a dark red. Flesh white, tender, juicy, vinous, sub-acid; quality very good. This is one of the few most desirable varieties for Minnesota, Wisconsin, Iowa, Nebraska, as well as the Eastern and Middle States. In season it differs somewhat, according to locality; in New York and neighboring states its season is December to February.

PERSONAL SERVICE IS THE FOUNDATION OF OUR SUCCESS

Yes—Friendship, Good Faith, Sincerity and Personal Service do exist in business. They are the foundations of Pomona's success.

R. I. Greening.

Pear Trees

THE HOME GARDEN is not complete without pears and they are a very profitable commercial crop in nearly all parts of the country. Pears will live on a variety of soils, but succeed exceptionally well in a hard clay soil. Tilling and fertilizing are advisable to a certain extent, but should not be carried far enough to produce too vigorous a growth. The quality of the pear is much improved by picking before maturity and by proper ripening indoors.

POMONA NEW LOW PRICE FOR ALL VARIETIES PEAR TREES

Size.	Age.	Height.	Grade.	Caliper.	Each.	Ten.	100.

Pomona 10c Sale Price { 2 Year Trees, 4 to 5 feet high, 35c each,
2 for 45c, 10 for \$2.00, 100 for \$14.00.

Mailing size trees 3 to 4 ft., add 3 cents to each tree to cover cost of mailing.

BARTLETT—Large, coloring when fully ripe to waxen yellow with red blush; juicy, melting, highly flavored. The tree bears early and abundantly. May be grown either as dwarf or standard, but succeeds best as standard. Aside from the fact that it bears early, regularly and abundantly, the Bartlett pear is justly popular on account of its size, beauty and excellence. August and September.

Seckel—Small size; yellowish russet, with red cheek; flesh whitish, buttery, very juicy and melting. A prolific bearer. Sept. to Oct.

Kieffer—Large to very large, skin yellow, with a light vermilion cheek; flesh brittle, very juicy, with a marked musky aroma; good quality. It is unfortunate that the merits of this fruit have been underestimated from the haste in which it is hurried to market in an immature condition, and often before it has attained the proper size.

ANJOU—For late fall and early winter use, there is no better variety. Quality equal to Bartlett. A close second to Bartlett in public favor. Distributes its fruit well, and stands up under a load better than Bartlett.

CLAPP'S FAVORITE—Large size; pale lemon yellow; flesh fine grained, juicy, melting, rich and buttery, earlier than Bartlett and resembling the Flemish Beauty in growth. A good grower and very productive.

Lawrence—Trees healthy, hardy and very productive. Fruit large; skin yellow, covered with brown spots. Flesh whitish, rich, buttery, and aromatic.

Duchess d' Angouleme—Very large; of greenish yellow, with patches of yellow and a dull red mostly covered with thin light russet; very juicy, melting, sweet and vinous. Oct. to Nov.

Wilder—Handsome, melting, sweet, pleasant, with small core, fine grained, tender and juicy. August.

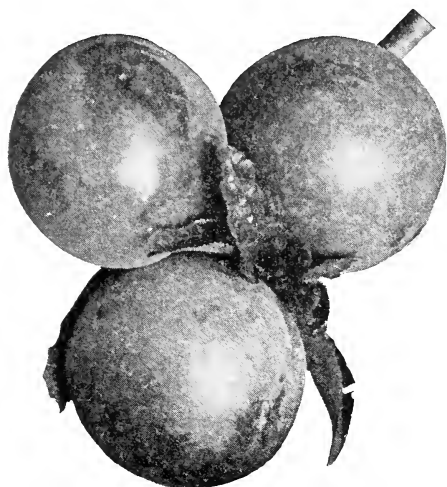

Beurre Bosc—Extra large size; deep russet yellow; high flavored and delicious. It is a favorite. Ripens in October and can be marketed at that time, but for best returns should be kept and marketed during the holiday season.

Sheldon—Large size; roundish; greenish yellow cheek; a vigorous and strong grower and a good bearer while quite young. Oct. to Nov.

Bartlett, King of Pears.

Plum Trees

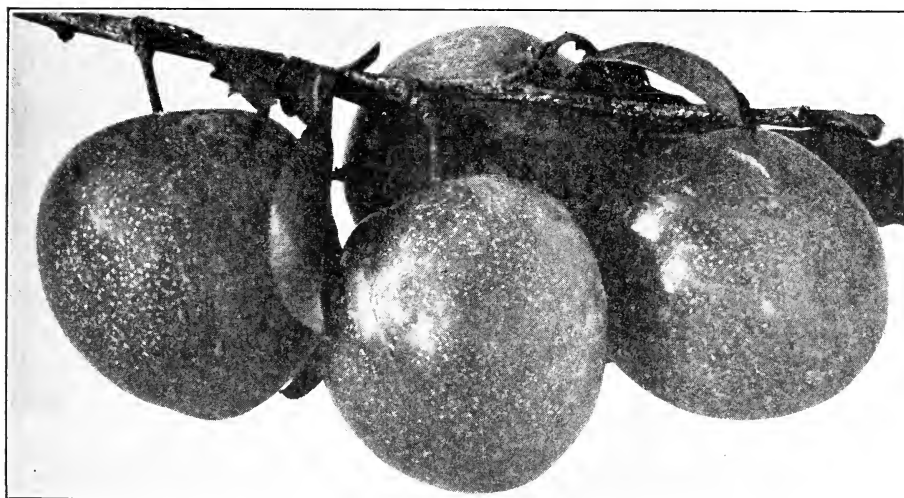

Abundance Plum.

MONARCH—A very handsome, large, rich purple plum that has attained popularity more quickly than any other plum of recent introduction. Flesh golden yellow, juicy and sweet. Trees hardy and productive. Ripens in October.

Abundance—The chief asset, which has given the variety its great popularity, is its name, abundance in fruit. Tree bears early in season, being a pinkish red changing to a darker red mottled with thin bloom. August.

BRADSHAW—The trees grow large and well formed, bear regularly and heavily. The plums are large, attractive in appearance, being a light purplish red changing to dark reddish at maturity, which occurs in July.

Burbank—Is handsomely colored dark red over a yellow ground. It is a very desirable variety for home plantations in New York, bearing early in July.

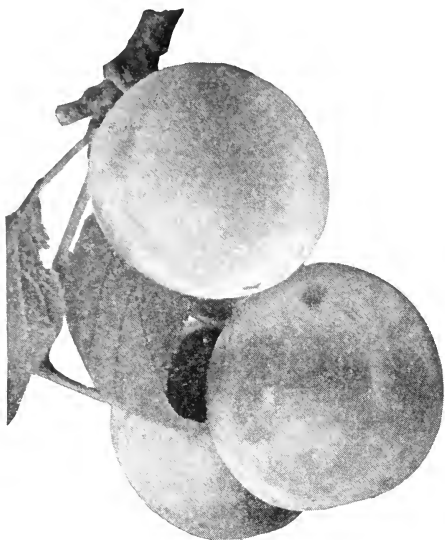

Bradshaw Plums.

Lombard Plum.

Yellow Egg—Golden yellow covered with thick bloom.

Reine Claude (Bavay's Green Gage)—Roundish, oval, greenish, marked with red in the sun; a great favorite. Sept.

Fellemburg—A fine late prune; oval, purple; flesh juicy and delicious. Sept.

NIAGARA—Of large size and first rate flavor; color dark blue. Good bearer; not liable to rot. Ripens about Aug. 1st.

RED JUNE—A consensus of the opinions of those who have had actual experience with the variety shows that it closely follows Abundance and Burbank in popularity. The color is a mottled garnet-red overlaid with thin but very distinct and delicate bloom. July.

LOMBARD (Purple)—A great favorite as it adapts itself to widely different soils and climates and does well where other varieties would not thrive. Robust, healthy, productive and a regular bearer. Extremely hardy. Skin dark purplish red overspread with a thick bloom. Flesh yellowish, firm and sweet. Free-stone. Ripens in late August.

YORK STATE PRUNE—A superior strain of the German Prune. Known in some sections as Fellemburg or Italian prune. The most widely grown of all plums. In our opinion the most profitable prune for orchard purposes and a variety that should be in every home garden. It is finely flavored whether eaten out of hand, stewed or cured as a prune.

Shropshire Damson—Fruit oval; tree a good grower and enormously productive; fruit of medium size produced in thick clusters or groups, dark purple color, esteemed for preserving. October.

No. 2418

Certificate

STATE OF NEW YORK

Department of Farms and Markets Certificate of Inspection of Nursery Stock

This is to certify that the stock of Pomona United Nurseries, of Dansville, County of Livingston, State of New York, was duly examined in compliance with the provisions of article 14 of the Farms and Markets law, and was found to be apparently free from any contagious or infectious disease or diseases, or the San Jose scale, or other dangerously injurious insect pest or pests. This certificate expires Sept. 1, 1932.

Dated Albany, N. Y., Sept. 25th, 1931.

BERNE A. PYRKE, Commissioner.
B. S. Van Buren, Director, Bureau of Plant Industry.

Select Varieties of Dwarf Fruit Trees

Dwarf Apple Trees. We can supply the following varieties: Yellow Transparent, Baldwin, McIntosh, Duchess, Delicious, Wagener, Wealthy, R. I. Greening, Cortland, and Red Astrachan.

2 Year Trees, 3 to 4 feet high, 60c each, 10 for \$5.00.

Dwarf Pear Trees. We offer the following list of varieties: Bartlett, Seckel, Clapp's Favorite, Duchess and Anjou.

2 Year Trees, 3 to 4 feet high, 50c each, 10 for \$4.50.

If ordered by mail add 3c to each tree to cover cost of mailing.

Peach Trees

PEACH TREES are easily cultivated. Their comparative freedom from disease, the short period before they become productive, with the immense demand for the fruit and the facilities with which it may be shipped to distant markets, make peach growing extremely profitable, and there are few kinds of fruits more highly prized and more keenly relished.

To secure healthy, vigorous and fruitful trees, the ground must be kept clean and mellow and it should receive an occasional dressing of wood ashes. It should be remembered that peaches are all borne on wood of the previous season's growth, and that this makes it absolutely necessary to prune the trees yearly, to remove dead branches and let in light and air, and keep the trees in good shape to produce bearing wood.

Rochester.

NIAGARA PEACH—The fruit of the Niagara peach is much like that of Early Crawford in appearance, being large, oval, yellow with brilliant red cheeks. The flavor is rich and piquant, reminding one of the very best peaches he ever ate. Season medium early.

Carman—A very hardy peach, ripening at same time as Early Rivers, yet almost as large as Elberta. Skin pale yellow with blush on sunny side; flesh white, tender, sweet and melting. Ships well. August.

J. H. HALE (Yellow, Freestone)—A notable variety of recent introduction, unusually large in size of fruit and very handsome. Largely advertised as a rival to Elberta for commercial honors, but reported in many sections as not prolific enough to compete with that grand old variety. Of a deep golden-yellow color overlaid with bright carmine. Flesh firm, fine-grained and good in quality.

CRAWFORD'S LATE—Of large size; skin yellow or greenish yellow, with dull red cheek; flesh yellow. Tree vigorous; moderately productive; one of the finest late sorts.

J. H. Hale.

Elberta.

CHAMPION—Tree and fruit buds extremely hardy—has stood 18 degrees below zero and produced a full crop the following summer. The flavor is delicious, sweet, rich and juicy; skin creamy white with red cheek.

Belle of Georgia—Large; white, with red cheek; flesh white, firm and of excellent flavor. Tree very productive. Early July.

ELBERTA—A valuable, large peach of good quality. The best orchard variety, and valuable also for planting in the garden. Elberta is hardier in bud than many varieties, therefore a more uniform cropper. Elberta is large, yellow, with red cheek, juicy and high-flavored; flesh yellow; freestone. Season medium early.

ROCHESTER (Yellow, Freestone)—A remarkable new early peach which seems to combine the high quality of the Early Crawford with the productiveness of the Elberta. Coming into the market as it does about two weeks ahead of Early Crawford, it commands not only the highest price but a ready sale. An early bearer, often producing fruit the year after planting. The fruit is large, yellow mottled with red in color, with thick, firm, juicy flesh, rich and sweet in flavor. The trees are hardy, vigorous and productive. Ripens here the middle of August.

CRAWFORD'S EARLY—A magnificent large yellow peach of good quality. Tree vigorous and prolific; its size, beauty and productiveness make it one of the most popular varieties. Season beginning of September. This valuable peach has long been a favorite for large size, beauty and quality of fruit. Most people when they buy peaches ask for Crawfords.

SOUTH HAVEN—Another successful introduction better than average size, globular, prolific, with dependably recurring crops. Its meat is yellow, juicy and deliciously sweet; the showy exterior an attractive ripe yellow with one red blotch. September 1.

Pomona Sour Cherry Trees

WE CONSIDER CHERRY ORCHARDS the most profitable of any fruit. The trees begin to bear two years after planting, growing rapidly so that in a short time you are able to realize handsomely on them. By arranging varieties the time of ripening can be lengthened out through June, July and August, thus enabling the planter to harvest the crop to best advantage.

POMONA NEW LOW PRICE FOR ALL SOUR VARIETIES CHERRY

Sour and Sweet Cherries on Mazzard Roots, 10 cents per tree higher.

ENGLISH MORELLO—Without doubt one of the most valuable of this class. English Morello is late and much liked by canning establishments. One of the safest cherries to plant.

EARLY RICHMOND—One of the most valuable and popular cherries, unsurpassed for cooking purposes. It is the good old variety that yields such marvelous crops in the gardens. The most hardy of all varieties, uninjured by the coldest winters. Tree slender in growth, with a roundish spreading head, exceedingly productive. Ripens through June.

MONTMORENCY (Large)—The most popular of all hardy cherries for market and home use. This cherry is planted largely in all parts of the country. The fruit is in great demand by canning factories and others, and sells at fancy

prices. It is of large size, light red in color, stem rather short. The tree is very hardy and a vigorous grower. The trees bear fruit soon after planting.

Dyehouse—A very early and sure bearer, ripens a week before Early Richmond. For tarts, pies and canning it has no equal for home use. June.

Wragg—A Russian variety. One of the hardest cherries, vigorous and productive, medium size, dark purple, fine quality and has produced annual crops at the northernmost limit.

Ostheime—Very hardy, fruit large and roundish. Flesh is liver colored, tender, juicy and almost sweet, although a sub-acid cherry. Quality good. Middle July.

May Duke—Large red; juicy and rich; an old, excellent variety; vigorous, productive. June 15.

Montmorency (reduced size).

Pomona Sweet Cherry Trees

Windsor—Fruit large; liver colored; flesh remarkably firm, of fine quality. Tree hardy and prolific. Vigorous. Middle of July.

BLACK TARTARIAN (Black Oxheart)—Very large; bright purplish black; half tender; juicy, very rich. Tree a remarkably vigorous and erect grower, and an immense bearer.

Lambert—A valuable Sweet Cherry of the largest size. Skin dark purplish red, al-

most jet-black when ripe. Flesh firm, rich and juicy. Tree hardy, a strong grower and an enormous bearer.

Gov. Wood—One of the best. Clear, light red; tender and delicious

NAPOLEON CHERRY (White Oxheart)—Fruit very large, oblong, pale yellow, with a bright red cheek in the sun. Flesh very hardy, brittle, reddish at stone, juicy and sweet. Tree a vigorous and erect grower, very productive. Early in July.

Champion—Fruit very large, fair and handsome. Tree very handsome, surpassing other varieties in this respect; bears abundantly while young; flesh cooks as tender as an apple and without hard spots or cores; flavor delicate, imparting an exquisite quince taste and odor to any fruit with which it is cooked. The most valuable of all.

Orange—Large, roundish; bright golden yellow; cooks tender and is of very excellent flavor. Valuable for preserves or flavoring; very productive; the most popular and extensively cultivated of the old varieties. October.

Rea's Mammoth—A seedling of the Orange—larger than that variety but of same form and color. Excellent flavor and very productive. It flourishes in any good garden soil, which should be kept mellow and well enriched. Prune off all the dead and surplus branches.

Meech's Prolific—The most prolific of all known varieties; ripens between the

Orange and the Champion. Bears very early, usually a full crop at three years; quality unsurpassed and size large.

Orange Quince

Apricots

THE leading characteristics of the apricot are extreme hardiness, early bearing, productiveness, and freedom from disease. Every garden should have one or more trees. In the selection of choice garden fruits it is quite indispensable.

POMONA NEW LOW PRICE FOR ALL VARIETIES OF APRICOTS

Extra Size	XXX	4 to 5 Ft.	75c each	10 for \$6.50
Medium Size	XX	3 to 4 Ft.	70c each	10 for \$5.50

65 cents each, 2 for 75 cents.

Mailing size trees 2½ to 3 ft., add 3 cents to each tree to cover cost of mailing.

J. L. Budd—Tree a strong grower and profuse bearer, fruit large, white with red cheek; sweet, juicy, with a sweet kernel, as fine flavored as an almond; the best late variety.

Moorpark—Large size, surface orange-red,

with a deep orange-red cheek, with a rich, high flavor.

Alexis—Very hardy; an abundant bearer; yellow, with red cheek; large to very large; slightly acid, rich and luscious. July.

Asparagus

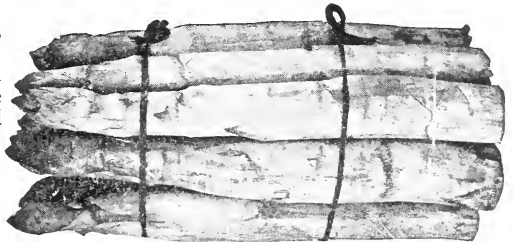

CULTIVATION—See that the ground is well drained, naturally or otherwise, work it up fine and deep and make it very rich with well rotted barnyard manure. Locate the plants eight inches apart in rows three feet apart. Spread out the roots in a trench made deep enough to permit their crowns to be covered with three or four inches of mellow earth. Give the bed liberal dressings of manure at intervals, and except near the seashore, three pounds of salt per square yard early every spring. Do not cut for use until the plants have grown two seasons.

New Washington Asparagus—This exceedingly resistant variety was developed by the United States Department of Agriculture. It is the finest of the large type asparagus. Its quick growing habit makes it extremely tender. It is vigorous in growth, of a deep green color, with a purple tinge, a decidedly good variety for the commercial grower and unexcelled for the home garden. The flavor is excellent, having a peculiar and pleasing sweetness. Should give this variety a trial.

Conover's Colossal—This variety is superior in size and quality, remarkably tender and fine flavored. Valuable for market and home use.

Palmetto—Until recently we believed that Conover's Colossal was the best sort known, but we are now forced to concede that the Palmetto is earlier and a better yielder, and more even and better in growth, and that it will eventually supersede the old favorite. The average bunches contain 155 shoots, measuring 13½ inches in circumference, weighing nearly two pounds. It has been tested both north and south, and has proved entirely successful in every instance.

Barr's Mammoth—This is one of the finest varieties of asparagus ever offered, being large and early. Stalks are large, tender and of light color.

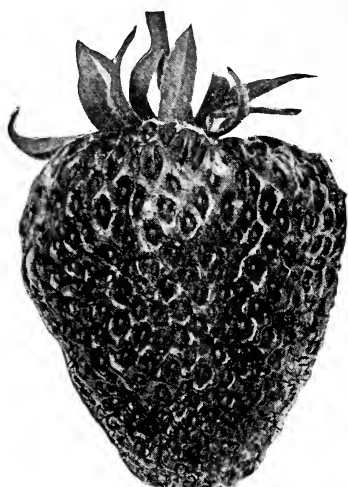

Conover's Colossal Asparagus.

PRICE FOR ALL VARIETIES OF ASPARAGUS NAMED ABOVE

Extra Strong 2 Year Roots, 25 for \$1.00, 100 for \$2.00, 1,000 for \$12.00

Strawberries

Corsican Strawberry.

NOTE.—Do not order strawberry plants sent by freight. Our patrons order from 50 to 500 trees, and 500 or more strawberry plants by freight. Now the trees should go by freight and the strawberries by express, or small lots by mail. In all cases when desired by mail, add postage at rate of 20 cents per 100. Always state plainly that the strawberry plants are to be sent by express or mail.

Prices for All Varieties of Strawberries (by Express)

25 for \$1.00, 100 for \$1.50, 1,000 for \$10.00.

If ordered by mail, 25 for \$1.10, 100 for \$1.70.

CURRENTS

The Currant is one of the most productive and best paying small fruit that we have. There is, we believe, more profit to the acre in currants than in any other small fruit.

WILDER (Red)—Very large; deep red; bunches long. Plants erect, stout, vigorous and productive.

Fay's Prolific (Red)—A cross between Cherry and Victoria. Of large size, fine flavor, and claimed to be twice as prolific as the Cherry.

RED CROSS—A strong growing variety. Cluster long; berry medium to large, bright red; quality good to best. Very productive.

Prices for All Varieties of Currants:

2 year Bushes, 35c each, 2 for 45c,

10 for \$2.25, 100 for \$15.00.

GOOSEBERRIES

Plant in good rich soil and give a liberal dressing of manure every season. Regular pruning every year is essential for the production of fine fruit.

SENATOR DUNLAP—A well tested, early variety, one of the safe sorts to plant everywhere. Fruit good size, regular form, beautiful bright red, glossy, firm, splendid keeper and shipper, excellent quality, one of the best for canning.

BRANDYWINE—A very late and firm berry; a good shipper, good canner, a good all around strawberry. Season medium late.

CORSICAN—Is a great strawberry for many reasons. First, it is the biggest berry; second, it is the brightest and best in color; third, it is a great yielder, and producer; fourth, and the most important of all, the foliage is exceedingly vigorous and leathery.

SAMPLE—Late, of large size, and yields enormous quantities of high quality bright red berries. A standard shipping variety.

HOUGHTON—Small to medium; roundish, oval, pale, sweet, tender, very good; plants spreading; shoots slender.

2 year Bushes.....45c each, 2 for 55c

DOWNING—Large, handsome pale green, and of splendid quality for both cooking and table use; bush a vigorous grower.

2 year Bushes.....50c each, 2 for 60c

Currant and Gooseberry Bushes, by mail add 3 cents to each bush ordered.

Rhubarb (Pieplant)

The first thing in the spring to furnish material for pie and sauce. Its health-giving, tonic properties make it invaluable as a spring regulator. Easy to grow. Should be in every home garden. Plant in rows 4 feet apart with roots 3 feet apart in row.

Myatt's Linnaeus—The best variety for general use. Stems large, tender and of refined flavor. Yields abundantly.

Strong Two-Year Roots

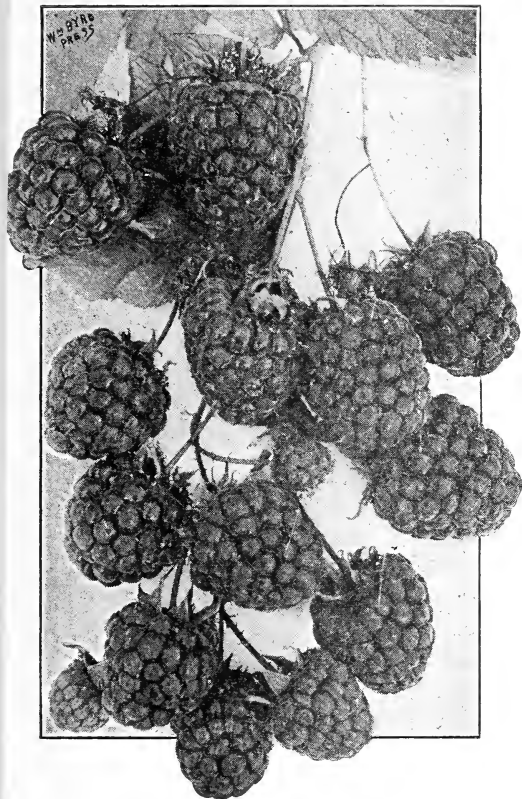

15c each, 10 for \$1.50, 100 for \$10.00

Raspberries

PRICE FOR ALL VARIETIES OF RASPBERRIES

Strong No. 1 Plants, 10 for 75 cents, 25 for \$1.00, 100 for \$3.50,
1000 for \$25.00

If ordered by mail, 10 for 85 cents, 25 for \$1.35, 100 for \$4.50.

La. ham Raspberry.

Red Varieties

WILL do well on any soil that will produce a good corn crop. Land should be thoroughly prepared and well enriched; ground bone is one of the best fertilizers. Keep well cultivated and free from weeds and suckers. As soon as they have done bearing, cut out the old wood to give more vigor to the young canes. Plant in rows 5 feet apart, 3 feet apart in rows.

St. Regis Everbearing—A wonderful new variety of Red Raspberry, bears fruit the

first season, bears for four months, beginning about June 15th. The second crop of berries is borne on the ends of the new canes and ripens about the middle of August and continues until frost.

CUTHBERT—Large, conical; deep rich crimson; firm, of excellent quality. Vigorous grower, entirely hardy and immensely productive. The best raspberry for general culture.

Marlboro—The best early red raspberry. Hardy and productive.

LATHAM—Ripens with the earliest and hangs to the last. Immensely productive and a fine shipper. Very hardy and does not sucker nearly so much as other red raspberries.

Purple Varieties

COLUMBIAN—Very large, often an inch in diameter; adheres firmly to stem and will dry on the bush if not picked. Very large, dark reddish purple, rich, juicy and delicious.

Black Varieties

KANSAS—Largest size, strong, vigorous grower, hardy, bearing immense crops. Size of Gregg.

Black Diamond—One of the best for home and market use. For drying and evaporating it excels all others. The fruit is large and handsome.

Cumberland—Plants vigorous, hardy and productive; fruit large. Mid-season.

Gregg—Plants vigorous, hardy and productive; fruit above medium to very large.

PLUM FARMER—Berry large and very productive; a great favorite in Western New York. A fine picker and one of the best market sorts.

Ohio—A very strong growing hardy sort; fruit nearly as large as Mammoth Cluster; more productive.

Blackberries

This profitable fruit should be planted for garden use in rows five feet apart, with plants three feet apart in rows; for market, in rows six feet apart, with plants three feet apart in the rows. Give the plants the same cultivation as for raspberries.

ELDORADO—The best all-round berry yet produced, combining nearly all the good qualities found in a blackberry. The vines are very hardy and vigorous, enduring the winters of the far Northwest without injury, and their yield is enormous. The berries are large, jet black, borne in large clusters and ripen well together; they are very sweet, melting, have no hard core and keep for eight or ten days after picking.

SNYDER—Extremely hardy; enormously productive; medium size.

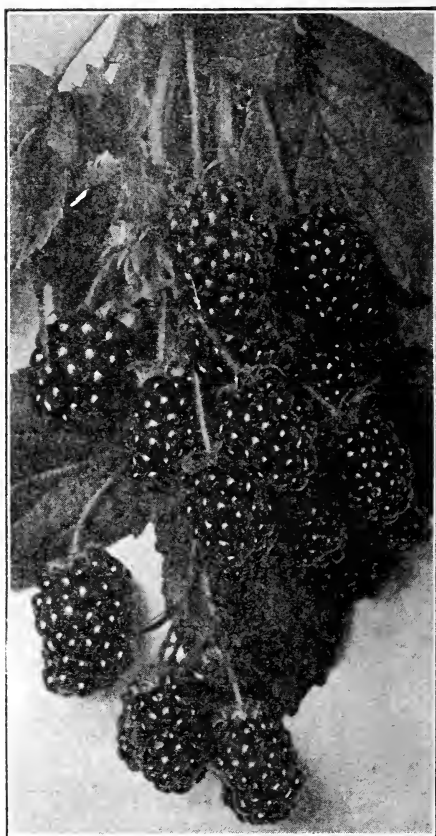

Wilson's Early—Large size, black, quite firm, rich, sweet and gold. Ripens early and matures its fruit rapidly; retains its color well after picking.

Minnewaska—Wonderful, hardy, productive, good blackberry, has not been forgotten by us, or our old patrons. Its principal points are hardiness, excellent quality, earliness, and continued bearing and productiveness.

Early Harvest—The earliest blackberry and valuable for market. The canes are strong and upright in growth and enormously productive. Berries sweet and of the highest quality.

Agawam—Ripens earlier than other kinds, and has a flavor similar and equal to the wild berry. Very hardy.

Blower—Large size, jet black, good shipper, best quality, unexcelled productiveness are the main characteristics of this splendid new sort.

Eldorado blackberry.

Price for all varieties of Blackberries, Strong No. 1 Plants. By Express, 10 for \$1.00, 25 for \$1.75, 100 for \$6.50, 1000 for \$40.00. By Mail (Postpaid) 10 for \$1.15, 25 for \$1.95, 100 for \$7.35.

Pomona United Nurseries, Dansville, N. Y.

Cohocton, N. Y., Jan. 16, 1932.

Gentlemen:—Please find enclosed check for Landscaping and Shrubs which you set out on my place in Cohocton. Everything is very satisfactory, and I wish to compliment you on the excellent work which you did for me.

Very truly yours,

G. A. WENTWORTH.

Should you desire the service of our Landscape Department, we will be glad to assist you in the proper arrangement of your trees, plants and shrubs.

Grapes

THE GRAPE is one of our most delicious fruits. Contrary to common opinion it does not demand a special or particular kind of trellis. We have seen vines bear by the bushel growing on a garden or yard fence. Hardy, thrifty, free of disease, the grape is our standby.

The grape is the most healthful of all fruits, and is most highly esteemed for its many and varied uses. Grapes can be grown by any one who has a garden or yard, and a little time to give to it. The vines can be trained up the side of a building, or a garden fence or over an arbor, but the more profitable way is to grow them over a wire trellis.

PRUNING—Annual and careful pruning is essential to the production of good grapes. If the roots are called upon to support too much wood, they cannot bring to maturity a fine crop of fruit. By proper pruning you concentrate the vigor of a vine into a smaller number of canes and clusters, which it can perfect. The prun-

ing should be done from November to March, while the vines are entirely dormant and before the sap starts.

Agawam (Roger's No. 15)—Berries very large, thick skin, pulp soft, sweet and sprightly; very vigorous; ripens early.

Diamond—Leading early white grape, ripening before Moore's Early.

Pocklington—One of the largest and most showy white grapes of the Concord type.

Catawba—Berries large, round; when fully ripe of a dark copper color.

Lindley (Roger's No. 9)—Berries medium to large, flesh tender, sweet, aromatic.

Salem (Roger's No. 53)—Bunch large, compact; berry large, round, coppery red; tender, juicy. Ripens with Concord.

NIAGARA WHITE—Occupies the same position among the white varieties as Concord among the black; the leading profitable market sort. Bunch and berries large, greenish white changing to pale yellow when fully ripe.

Campbell's Early (Black)—Strong grower, with large, healthy foliage; productive, its keeping and shipping qualities are equalled by no other early grape.

Diamond White—The leading early white grape, ripening before Moore's Early. White, with rich yellow tinge; juicy, few seeds, almost free from pulp, excellent quality.

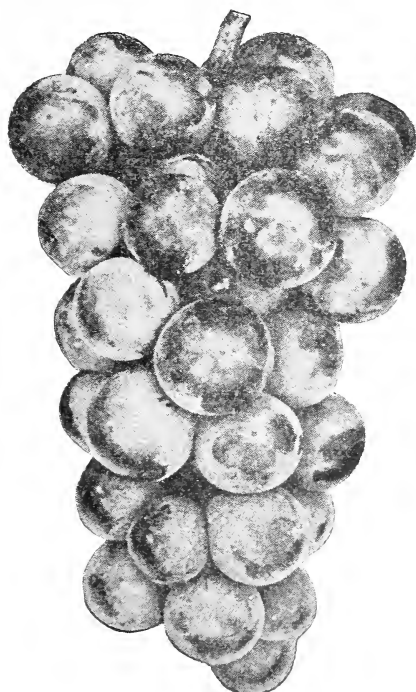

Chas. A. Green White—Claimed by the introducer to be a new and valuable variety, a vigorous grower and an enormous yielder of very large and beautiful clusters.

McPike—This mammoth black grape has been exhibited in all parts of the country, its great size, fine flavor and beauty creating quite a sensation.

MOORE'S EARLY (Black)—Bunch and berry large, round with heavy bloom; vine exceedingly hardy. Its earliness makes it desirable for an early market.

Brighton—Perhaps the best red grape in cultivation. Bunch large, compact; strong grower and very productive.

Concord—Black. Bunch large, shouldered, compact; berries large, covered with a rich bloom, skin tender, but sufficiently firm to carry well to distant markets; flesh juicy, sweet, pulpy, tender; vine a strong grower, very hardy.

Concord Grape.

PRICE FOR ALL VARIETIES OF GRAPES

Strong 2 yr. Vines, 20 cents each, 2 for 30 cents, 10 for \$1.50, 100 for \$15
Mailing size 2 year Grape Vines, add 3 cents to each vine to cover mailing.

Pomona Evergreens at Reduced Prices

Add Dignity to Summer and Colorful Life to Winter Scenes

American Arborvitae.

American Arborvitae—Much used for hedges, screens, singly on lawns, and in tubs for porches, etc. It is a handsome little tree, and if allowed to grow naturally will be quite tall and pyramid-shaped. **Price:** 15 to 18 in., 50c each; 10 for \$4.50. 18 to 24 in., 75c each; 10 for \$7.00. 2 to 3 feet, \$1.00 each; 10 for \$9.00.

Pyramidal Arborvitae—One of the most beautiful varieties, very erect and regular in form, resembling the Irish Juniper. **Price:** 18 to 24 in., \$2.00 each; 10 for \$17.50. 2 to 3 feet, \$2.50 each; 10 for \$20.00.

Engelmanii Spruce—A splendid Evergreen for specimen planting. Conical pyramidal form, foliage of a blue tint. Resembles Colorado Blue Spruce. **Price:** 18 to 24 in., \$1.00 each; 10 for \$9.00.

Douglasi Fir—Leaves light green above, glaucous below. Conical form, branches spread light and graceful. A rapid grower. **Price:** 15 to 18 in., 85c each; 10 for \$7.50. 2 to 3 feet, \$1.00 each; 10 for \$9.00.

Colorado Blue Spruce—Unquestionably the most beautiful of all evergreens, beyond words of description. Its foliage of rich, glistening blue, its stately and symmetrical growth are admired by all. You will be justly proud of having one or more of these beautiful trees on your grounds. Unexcelled for specimen plantings, which will add distinction to your home. **Price:** 15 to 18 in., \$2.50 each; 10 for \$20.00. 2 to 3 feet, \$3.50 each; 3 to 4 feet, \$5.00 each.

Norway Spruce—A lofty, elegant tree of perfect pyramidal habit, remarkably elegant and rich. As it gets age, has fine, graceful pendulous branches. It is exceedingly picturesque and beautiful. Very popular and should be largely planted. One of the best evergreens for hedges. **Price:** 15 to 18 in., 45c each; 10 for \$4.00. 18 to 24 in., 65c each; 10 for \$6.00. 2 to 3 feet, 75c each; 10 for \$7.00.

Irish Juniper—Erect, slender and formal in habit; foliage sage green, very compact; making a splendid column, sometimes 12 to 15 feet high; much used in cemeteries. **Price:** 2 to 3 feet, \$2.00 each; 10 for \$17.50.

White Spruce—Compact, upright growing, long-lived, retaining its branches to the ground, aromatic, drought-resisting; varies in color from light green to glaucous blue. **Price:** 18 to 24 in., 85c each; 10 for \$6.50. 2 to 3 feet, \$1.00 each; 10 for \$9.00.

Juniper, Pfitzer's—This low spreading Evergreen of greenish blue is equally satisfactory in the extreme North as well as South, and will survive in shady or sunny exposure. **Price:** 18 to 24 in., \$1.75 each; 10 for \$15.00.

Arborvitae, Globosa—Forms a natural globe without any trimming. An excellent dwarf variety. **Price:** 1½ to 2 feet, \$2.00 each; 10 for \$17.50.

Pine, Mugho—A low, compact grower, stiff leaves of an excellent green color. The new growth closely resembles tiny candlesticks over the entire tree. **Price:** 15 to 18 in., \$2.00 each; 10 for \$17.50; 18 to 25 in., \$2.75 each.

Tom Thumb—Small, compact, with feathery foliage; a beautiful ornament for small yard or cemetery lot; for low hedges.

Price 15 to 18 in., \$2.00 each; 10 for \$17.50.

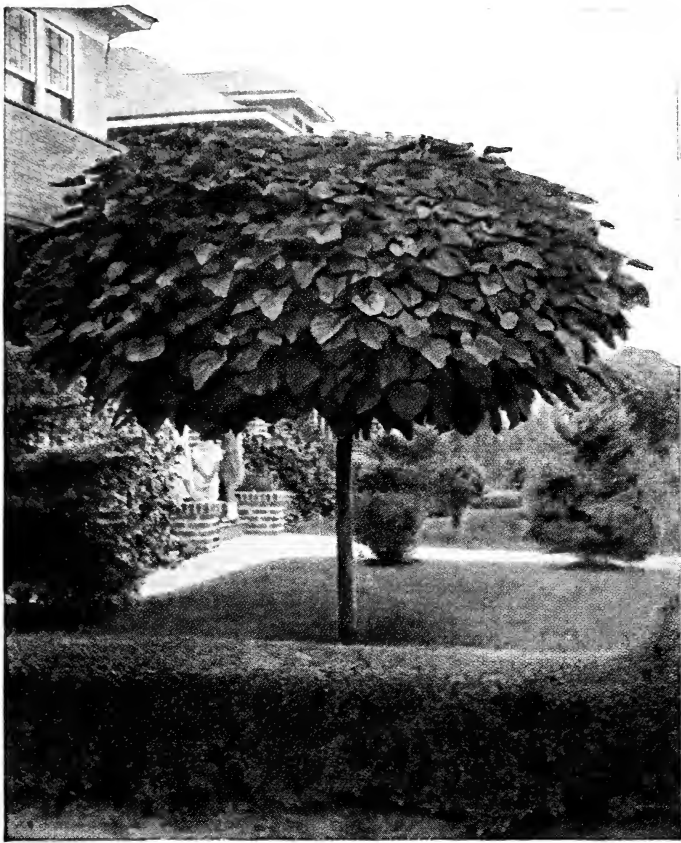

All Evergreens are dug with ball of earth and roots securely wrapped in burlap.

Colorado Blue Spruce.
